

SYED MUHAMMAD DANIYAL HAIDER

Junior AI Automation Engineer | Python Developer | RAG & Workflow Automation

Lahore, Pakistan | 0312-4476901 | daniyalhaider784@gmail.com

linkedin.com/in/syeddaniyalhaider3 | github.com/syed-daniyalH

PROFESSIONAL SUMMARY

AI Automation Engineer with hands-on experience shipping production-grade automation systems for real clients. Specialise in end-to-end workflow automation (n8n, Make.com), RAG-powered AI agents (Qdrant, LangChain, OpenAI), and custom backend integrations (FastAPI, PostgreSQL). Built and deployed a RAG chatbot with semantic search, an autonomous LinkedIn job applier with multi-LLM support, and AI-driven CRM pipelines that cut manual processing by up to 70%. Focused on building systems that run themselves.

TECHNICAL SKILLS

AI & Automation LLM API Integration, RAG Pipelines, Prompt Engineering, Multi-Agent Orchestration, n8n, Make.com

Vector DB & RAG Qdrant, OpenAI Embeddings, Semantic Search, LangChain, RAG Pipeline Design

CRM Zoho CRM — Auditing & Configuration, Workflow Automation, Lead Sequences, WooCommerce & QuickBooks Integration

Monday.com — Instagram Lead Capture via Make.com & Webhook Automation

Python Stack Python 3.x, Pandas, NumPy, Matplotlib

API Development FastAPI, RESTful API Design, JSON, Webhook Handling

Databases PostgreSQL, Neon DB, SQL, Database Schema Design

Services & Tools Docker, Render, Vercel, Git, GitHub, VS Code, Postman, Jupyter Notebook, Twilio, Vonage, QuickBooks (QBO)

Other Agile / Scrum, No-code Automation, API Documentation, Client Communication

WORK EXPERIENCE

Junior AI Automation Engineer

Mar 2026 – Present

Techionik | Lahore, Pakistan

- Built and managed automation workflows for 3+ active clients using n8n and Make.com, covering integrations with OpenAI, Twilio, and existing CRM platforms — manual processing time dropped ~70% after go-live.
- Maintained and extended the QuickBooks–FastAPI invoicing pipeline, automating billing for 5+ clients and eliminating manual work per billing cycle.
- Set up AI calling agents for inbound/outbound flows; lead response times reduced from 4+ hours to 15–20 minutes across several accounts.
- Audited and reconfigured Zoho CRM setups for clients — resolved broken workflows, rebuilt pipeline stages, and integrated WooCommerce and QuickBooks for end-to-end deal automation.

AI Automation Engineer (Intern)

Dec 2025 – Mar 2026

Techionik | Lahore, Pakistan

- Built 5+ client automation workflows using n8n and Make.com, connecting OpenAI and Twilio into existing CRM setups to remove manual steps.
- Co-built the QuickBooks–FastAPI invoicing integration; manual billing time per job dropped by ~70% post-launch.

PROJECTS

Featured

Techionik Website Chatbot — RAG-Powered Support Agent

Next.js · FastAPI · Qdrant · OpenAI API · Vercel · Hostinger

- Chunked and embedded company docs/FAQs via OpenAI; stored vectors in Qdrant for semantic retrieval.
- FastAPI backend retrieves top-k chunks per query and passes context to the LLM for grounded responses; streaming UI built in Next.js, deployed live on the Techionik website via Hostinger.

Dispatch Alex — AI-Powered Automotive CRM Automation

Make.com · FastAPI · PostgreSQL · React · TypeScript · QuickBooks API · Vercel · Render

- Automated inbound SMS handling via Twilio and OpenAI intent detection; replies sent without manual intervention.
- FastAPI backend handled technician assignment and job tracking on creation; auto-generated QuickBooks invoices on completion. Live at dispatch-alex.vercel.app.

SM2 Racing — Race Data Automation & OCR Pipeline

Make.com · OCR · OpenAI API · Google Sheets · Next.js · FastAPI · Vercel · Render

- Pipeline ingests raw race notes and images via OCR and OpenAI, extracts key metrics (lap times, tire pressures, RR bound data) into Google Sheets — reduced event processing from 2 hours to under 5 minutes.
- Summaries auto-publish to the web app with no manual step between raw input and finished report.

Monday.com — Instagram Lead Capture Automation

Monday.com · Make.com · Instagram Lead Ads · Webhook Integration

- Built a Make.com pipeline triggered by Instagram Lead Ad webhooks; automatically maps all contact fields into structured Monday.com board items in real time — eliminating manual data entry entirely.

LinkedIn Content Automation — n8n AI Agent Workflow

n8n · OpenAI · DALL-E · SerpAPI · LinkedIn API

- Scheduled n8n workflow researches trending topics via SerpAPI, generates post copy and hashtags via OpenAI, and produces a matching image via DALL-E.
- Draft delivered to client for approval; approved posts publish automatically, rejections trigger regeneration — saves ~3–4 hours/week per client.

Personal

ApplyPilot — LinkedIn AI Auto Job Applier

Python · Selenium · OpenAI API · Flask · ChromeDriver · Stealth Automation

- Built a browser automation engine that searches LinkedIn by role/location, fills Easy Apply forms in real time using LLM-powered answering, and auto-uploads a configured resume — end-to-end with no manual input.
- Dashboard (Flask) tracks application stats live; stealth mode with human-like interactions and randomized click intervals to maintain account safety.
- Supports OpenAI, Gemini, and DeepSeek as interchangeable LLM backends for form answering.

Vendor Analysis Pipeline

Python · Pandas · NumPy · Jupyter Notebook · Excel/CSV

- Built a Python pipeline to clean, standardize, and currency-convert multilingual vendor data from multiple regions — reduced manual prep time by ~65%.
- Output formatted to client spec and delivered ready to use without further processing.

EDUCATION

Bachelor of Science, Computer Science

Government College University (GCU), Lahore | 2021 – 2025

Relevant Coursework: Data Structures & Algorithms, Database Systems, Software Engineering, Artificial Intelligence, Web Technologies, Computer Networks.

Final Year Project: Potato Disease Detection & Recommendation System — Flutter mobile app with a REST API backend that detects potato diseases from images and provides information on disease lifecycle, treatment, and crop management recommendations.
